

NIDHI BHAGWAT

nidhibhagwat3@gmail.com | Ph :+91 8050048044 ||  [LinkedIn](#)

Professional Summary

Aspiring AI Engineer and backend developer with hands-on experience in Python, Natural Language Processing, and AI-powered applications. Skilled in developing intelligent systems including plagiarism detection platforms and resume screening tools. Experienced in backend development using Django and Flask with strong foundations in text processing, APIs, and database-driven applications.

Technical Skills

- **Programming:** Python, SQL, HTML, CSS
- **AI / NLP:** Natural Language Processing, Semantic Similarity, Text Processing, TF-IDF, Machine Learning
- **Libraries & Frameworks:** Scikit-learn, Pandas, Numpy
- **GenAI & LLM:** Prompt Engineering, Gemini API
- **Frameworks:** Flask, Django, REST APIs
- **Databases:** SQLite, SQL
- **Tools:** Git, Claude, VS Code

Experience

AI Intern — Artsy Technologies

Feb 2026 – Present

- Assisted in the development and testing of AI-based applications using Python.
- Supported backend development using Flask APIs and database integration.
- Participated in debugging, feature development, and documentation of AI-driven systems.

Education

B.E. in Information Science and Engineering

Global Academy of Technology, Bengaluru

2022 – 2026

Pre-University

RN Shetty PU College

2020-2022

Projects

AI-Powered Plagiarism Detection and Assignment Analysis System (Major Project)

- Developed a full-stack plagiarism detection platform using Django to analyze student assignments.
- Integrated Google Gemini Vision AI for OCR-based text extraction from assignment images.
- Implemented plagiarism detection pipeline combining APIs, web pattern analysis, and similarity detection.
- Designed role-based dashboards for teachers and students with automated analysis reports.

Intelligent Resume Screening System (AI + NLP)

- Built an AI-powered system that ranks resumes against job descriptions using semantic similarity.
- Implemented Sentence Transformers embeddings with cosine similarity scoring.
- Developed resume parsing modules to extract candidate details from PDF and DOCX files.
- Built Streamlit and Flask interfaces for candidate ranking and results visualization.

MyExpenses — Expense Tracker

- Developed a web-based expense tracking application using Flask and SQLite.
- Implemented CRUD operations to add, update, delete, and manage expense records.
- Built backend logic for efficient financial data storage and monthly summaries.
- Designed a responsive interface using HTML and CSS.

Certifications & Achievements

- Microsoft Power BI Certification — Infosys
