

NIDHI BHAGWAT

AI/ML Engineer & Software Engineer

Bengaluru, India | nidhibhagwat3@gmail.com | +91 8050048044 | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Aspiring AI Engineer and Software Engineer, and recent Information Science & Engineering graduate (CGPA 9.41/10) with hands-on experience in Python, Natural Language Processing, and AI-powered applications. Skilled in developing intelligent systems including plagiarism detection platforms and resume screening tools. Experienced in backend development using FastAPI, Django, and Flask with strong foundations in text processing, APIs, and database-driven applications.

TECHNICAL SKILLS

Programming: Python, SQL, HTML, CSS

AI / NLP: NLP, Semantic Similarity, Text Processing, TF-IDF, Machine Learning

Libraries & Frameworks: Scikit-learn, TensorFlow/Keras, Sentence Transformers, Pandas, NumPy

GenAI & LLM: Prompt Engineering, Gemini API

Backend & Frontend: FastAPI, Flask, Django, React.js, REST APIs

Databases & Tools: MongoDB, SQLite, PostgreSQL, Git, Docker

EXPERIENCE

AI Intern — Artsy Technology Pvt. Ltd.

Feb 2026 – Jun 2026

- Developed backend REST APIs using FastAPI for secure, efficient communication between application modules.
- Built and integrated frontend components using React.js, ensuring responsive and user-friendly interfaces.
- Implemented JWT-based authentication and Role-Based Access Control (RBAC) for secure user access management.
- Performed MongoDB database operations including data storage, retrieval, and management.
- Used Git for version control and participated in testing, debugging, and resolving integration issues.

PROJECTS

SmartEval — AI-Powered Plagiarism Detection & Grading System

Django · Gemini API · NLTK · scikit-learn · PostgreSQL

- Built a complete Django web platform that reads handwritten assignments, checks for copied content, and detects AI-generated text.
- Used Google Gemini AI to extract text (OCR) from photos of handwritten assignments.
- Combined three similarity-detection methods for more accurate plagiarism catches, and added an AI-generated-content detector.
- Delivered automated High/Medium/Low risk reports through a teacher dashboard, removing manual checking.

Intelligent Resume Screening System

Sentence Transformers · Flask · scikit-learn · SQLite · Docker

- Built a web tool that scores and ranks resumes against a job description automatically using semantic embeddings and cosine similarity.
- Parses resumes from PDF and Word files, including scanned documents.
- Ranks 10 resumes against a job description in 1–3 seconds, with an explanation of why each candidate was scored that way.

Medicinal Plant Identification Using CNN

TensorFlow/Keras · Flask · Pillow · NumPy

- Trained a CNN image-recognition model on 1,153 leaf photos to identify 10 medicinal plant species, including images taken in real outdoor conditions.
- Built a Flask web app where users upload a leaf photo and instantly get the plant name and its medicinal uses.
- Delivered as a full academic project with a written report, system diagrams, and documentation.

MyExpenses — Personal Expense Tracker (Desktop App)

Python · PyQt6 · SQLite · OOP · SQL

- Built a desktop app with a clean 3-layer architecture separating entry point, UI logic, and database layer.
- Built the full GUI in PyQt6 with dropdowns, date pickers, input fields, and a live-updating expense table.
- Integrated a local SQLite database with parameterized Create/Read/Delete queries (SQL-injection safe) across 8 expense categories with date-based sorting, plus input validation and a delete-confirmation dialog.

EDUCATION

B.E. in Information Science and Engineering — Global Academy of Technology, Bengaluru

2022 – 2026

CGPA: 9.41 / 10

Pre-University — RN Shetty PU College

2020 – 2022

CERTIFICATIONS

- Learning Microsoft Power BI — Infosys Springboard
- TechA: Web Development using HTML and CSS Foundation — Infosys Springboard
